

Why do I need Maternity wear?

Pregnancy is not about confinement, rather it is about enjoyment! Homemakers and bread earners alike, pregnant women of today want maternity clothing that is comfortable and will look smart. Your life undergoes a lot of change when you are expecting, but luckily those changes do not have to include losing your style! Feeling too big for your clothes can be an unnerving feeling. Well, it does not have to be anymore! Maternity clothing is now here in India, allowing you to look fashionable and feel comfortable at the same time.

How soon should I shop for Maternity clothes?

Our experience says that most moms and dads-to-be cannot wait to start their maternity wear shopping from the moment they hear the good news! Others get by in their own clothes until about three months, but at some point you'll find your lower half gets too big for your current clothing and your upper half will start stretching your tops. As a mom-to-be, your top priorities are comfort and style. After all, how is a girl to survive morning sickness when her waistbands are starting to pinch?!

All the same, when shopping for online maternity wear is just a click away, why wait?

What are the first maternity clothes that I should be buying?

We suggest that your maternity wear wardrobe should include mix-n-match basics that can be worn together or with other items that you might purchase in the course your nine months. A few good pairs of neutral and black formal trousers, casual multi-occasions trousers, couple of skirts and stretch pants should be great choices to begin with. These can be paired with coordinating tops like formal shirts, kurtis (mid length tops), yoga tees, party tops etc. This mantra for maternity clothing can go a long way in giving you a fresh new look and a much needed psychological boost just when you need it most.

How do I know what size I am in maternity clothes?

Many women make the mistake of thinking that they need to buy bigger sizes when they are pregnant. But now exclusive maternity wear manufacturers have found a smarter solution. At UZAZI maternity wear India, we scale the clothes to fit your pre-pregnancy size and make necessary adjustments to fit growing bellies and bosoms. This way, pant legs and sleeves still fit to your frame, necklines fall correctly and hemlines are proportionate.

What is so different and special about maternity wear that I can't do without?

Maternity clothes don't just involve different tailoring but a lot more innovation! Today's maternity clothing is all about allowing expectant mums to continue with their own style and yet adapt to the growing need for comfort as you progress in your pregnancy.

Maternity wear is designed with important features such as button-hole elasticized waistbands, belly support, adjustable clothing, stretchable & breathable fabric and nursing openings. Designs that are meant to flatter and styles that are especially engineered to accommodate all this give maternity clothing an edge over your normal clothes, which cannot provide the same options.

What is the type of fabric used for maternity wear?

The beauty of *maternity clothing* is the research that goes into making it absolutely comfortable for new mothers. Natural, breathable fabrics suitable for weather in *India* are predominantly used for our *maternity wear*.
